## Summer Goods Now Offered At Reduced Prices

## Showing Summer Fashion Is On The Wane

## Bathing Suits Are Offered In A Variety

## The Latest In Shades And Fabrics In Gowns

(By Florence Fairbanks)

New York, July 9.—Astronomically speaking summer has just begun, but in the almanac of fashion it is already on the wane. Convincing evidence of that fact is to be found in the big shops which offer summer goods and frocks at greatly reduced prices. Women of moderate means may pick up many excellent bargains, provided they are clever enough to avoid all extremes of color and style and purchase only such materials or frocks as may be worn next season without being hopelessly out of fashion.

Now is the time for bathing suits and in all the big shops such suits are offered in a variety of styles and materials. The cut of the modish bathing suit has considerable variety despite its circumscribed limits. Blouse and skirt, joined under a belt which is permanently attached so that there can be no severing of diplomatic relations, is the arrangement most generally accepted, but much is done with princess front panels and belted sides and back. These models look trim and attractive if worn with a bathing corset and by a slender bather; but the stout woman and the woman who scorns even the softest of bathing corset girdles, is wise if she clings to blouse and skirt.

The first law of the bathing costume is that it should be thoroughly neat and trim, should stay together, and the bathing costume made to order and carefully fitted has an advantage in this respect, though there are innumerable smart ready made models which can be carefully fitted and made thoroughly satisfactory.

Without doubt the black satin bathing suit, well made, of good quality and relieved by white or soft color next to the face, is the smartest, handsomest and most tasteful thing a bather can wear. Fine black mohair is less expensive and even more practical and is the general choice, while taffeta, firm, fast color black or black and white sateen, black on black and white wash taffeta and black and white foulard all have their admirers. For those who insist upon wool fine serge is first preference with flannel and challie bring up the rear.

Dark blue is a good color for the bathing suit, though it does not stand the wear and tear so well as black, and some very good looking models are shown this season in gray. For the woman to whom brown is becoming a brown mohair or satin suit with brown cap and stockings and white collar and shoes is extremely pretty.

The fad of the Russian blouse is echoed in some of the new bathing costumes, and is developed quite attractively in a soft gray silk with bias band trimming piped in black. The tunic is square necked, short sleeved and girdled and is bordered throughout with a band, while the short skirt has a box plait front and back. A pretty model of this class is in dark blue mohair with bands of coarse linen crash embroidered in cross stitch design of gay colors.

A knitted jersey or middie blouse of gray wool with white sailor collar, worn with a gray serge skirt, is shown among the imported bathing suits in one house. The same house also shows comfortable and practicable bathing cloaks or caped of blue or black serge with braided collars and borders or embroidery border. These are long and ample, tie at the throat with cords and are for throwing on as the bather goes to and from the water. This is an European fashion, and a maid usually goes with the cloak, taking it as the bather enters the water and waiting with it until she comes out.

The fashionable women of Paris have adopted the short skirt, but have added features which practically destroy all the advantages of usefulness and comfort which the short skirts used to offer. The new skirt is so tight that special corsets are needed for a correct fit. And, lest any free-

dom should be allowed, the mode requires a tight band to be put around the skirt just above the ankle to draw all the fullness remaining into absurdly small width.

These skirts are very hard to make, although at first glance they may not seem to be so. All lines run up and down as much as possible, flaring slightly toward the hem, but being held in place by a band or fold of the material. This makes it difficult to give the requisite air of style to the gown. But, for all that, very few long skirts are to be seen. Many gowns intended for daytime wear have no trains at all, and those that cannot be called short lie on the floor.

Smoke-gray voile nixon, a material that lends itself to dressmaking more easily than mouseline de sole, is being employed in the latest models for the summer. A charming design is carried out of gray voile over a foundation skirt of white taffeta covered with a creamy mouseline de sole that gives a warm tone to the general effect of gray. If the short skirt is difficult to make so as to look well, the new waist is a puzzle. It is universally cut in one with the sleeve. The kimono sleeve is the general outline, but with a bunched fullness under the arm being avoided by a seam. The desired effect is produced by always making the waist over a fitted lining, with sleeves set in the regular shoulder seam. Over the taffeta comes the white mouseline de sole, and then the voile, slightly gauged at the waist and finishing at the hem with a four-inch band of gray taffeta. The bodice is made entirely of white lace-Valenciennes, Malines, Chantilly or any thin filmy weave—and shaped like an ordinary blouse that can be worn with or without the smoke-gray voile dress. Over this lace blouse are crossed braces of colored ribbon, toile de Jouy, or rose cretonne, veiled with the gray, transparent material, giving just the touch of undefined color that makes the dress attractive.

The sleeves are of the transparent lace, without a lining, covered with the voile. A gray satin scarf, lined with white satin, is draped around the shoulders and falls in long ends from the arms, tightly held across the back with the pretty movement some women know so well, and a gray hat and white gloves make the prettiest of toilets.

Satin scarfs are worn a great deal in Paris. From morning till night the graceful width of satin lined with white is seen on each toilette of the day, and again with the low dress at dinners or receptions. The scarf matches the dress in color, but is invariably of the softest satin, be the dress in mouseline de sole or embroidered lawn.

Maline is used to an ever increasing extent as the season advances, not only for veiling flowers and features on hats, but for bows and loops on hats, for neck bows and for veiling entire costumes it has a distinct place.

The rosette on the plain sailor hat gives all the richness necessary. Folded like a rose in a round shape, a bit piece of Persian silk has been so manipulated that its final effect would suggest both expense and art.

Tailored costumes with the white linen or the fine hair striped of black or color are remarkably smart if made up with pipings of a plain linen, matching the color of the hair line.

Some of the pretty foulard petticoats are finished with lace-trimmed ruffles. A muslin ruffle under the outer ruffle helps to lengthen the life of the skirt.

The short coats range in length from hip to within two inches of the knees. So far the really short coat and the Eton jacket have not gained any secure position.

The new corset is a good deal lower in the bust than was the case last year. Its waist is still long, and its hips are narrow, straight and long. Gilt buttons are used for trimmings as well as for fastenings on the trim linen suits for young girls.

## STATE OF OHIO, CITY OF TOLEDO, LUCAS COUNTY, ss:

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

FRANK J. CHENEY.  
Sworn to before me and subscribed, in my presence, this 6th day of December, A. D., 1886.

(Seal) A. W. GLEASON,  
Notary Public.  
Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials free.

F. J. CHENEY & CO., Toledo, O.  
Sold by all Druggists, 75c.

Take Hall's Family Pills for constipation.

## BIRTHS

A daughter was born Friday afternoon to Mr. and Mrs. Harry Koons of East Chestnut street.

## RESULTS

## Of Great Importance And Of Lasting Benefit

## Expected From The Pan-American Conference

## Which Commenced At Buenos Ayres Today

## The United States Delegation In Evidence

## An Elaborate Program For The Conference

Buenos Ayres, July 9.—Results of great importance and lasting benefit to the United States as well as to the Latin-American republics are expected from the fourth Pan-American Conference which met here today in an informal manner for the preliminary work of receiving the credentials of the delegates and receiving them in behalf of the Argentine government. Delegates from the United States, Mexico and practically all the other Central and South American republics are in attendance and the list contains the names of some of the most distinguished statesmen, diplomats and experts to international law of the countries represented.

The delegation representing the United States, which arrived here in the U. S. army transport Sumner a few days ago, consists of Henry T. White, former ambassador to France; Lewis Nixon, the ship builder; John Bassett Moore, Professor of International law at Columbia University; David Kinley, dean of the University of Illinois; Bernard Moses, professor of political science at the University of California; Col. Enoch Crowder, assistant to the Judge Advocate General, U. S. A.; Paul S. Reinsch of the University of Wisconsin and Lamar C. Quintero, an editor at New Orleans. Prof. Shepherd of Columbia University accompanies the delegation as official secretary. Among the special representatives of the government is Edward B. Moore, commissioner of patents, who will act as expert attaché.

The program of the conference, which has been previously prepared and agreed upon by the representatives of the various governments interested, include a practically complete survey and consideration of the international relations, political, commercial and otherwise, between the republics of the American continent.

Immediately after the permanent organization of the conference exercises will be held in commemoration of the Argentine national centenary and of the independence of the Latin-American republic.

The actual work of the conference will begin when the various delegations submit their reports concerning the action of their respective governments upon the resolutions and conventions of the third Pan-American conference held at Rio Janeiro in July, 1906. The reports will be discussed and the extension of the functions of the committees considered. The report of the director of the International Bureau of the American Republics will also be given careful attention and it is expected that a resolution expressing appreciation to Mr. Andrew Carnegie of his generous gift for the construction of the new building of the American Republics in Washington will unanimously be passed.

Reports will be made on the progress which has been made in bringing about the completion of the Pan-American railway since the conference at Rio de Janeiro and the question will be considered how best to bring about co-operation with that end in view. The program also contemplates the discussion of various other important matters, among them the establishment of more rapid mail, passenger and express steamship service between the American republics; the bringing about of uniformity among the American republics in consular reports and documents, the technical requirements of customs regulations and also in census and commercial statistics; questions of sanitary police and quarantine regulations for the elimination of preventable diseases; the bringing about of an understanding between the American republics covering patents, trade marks and copyrights; continuance of the treaties on pecuniary claims after their expiration; promoting the interchange of professors and students among the universities and academies of the American republics; united action for the

conservation of natural resources; supervision of the food supplies in the different republics and the adoption of some regulations concerning wireless telegraphy and aerial navigation.

Throughout Central and South America the importance of this congress is generally recognized and a great deal of good is expected from this, the fourth of the conferences. The first, which was originally suggested by President Arthur, was held in Washington in 1889; the second in the City of Mexico in 1902 and the third at Rio de Janeiro, in 1906. The Rio de Janeiro conference was attended by Elihu Root, then secretary of state, and proved far reaching in the effect of bringing about closer relations and a better understanding between the United States and the Latin-American republics. It is expected that the conference, in addition to the subjects included in the program, will consider many other matters of international interest, among them a proposition to bring uniformity into the standard maps of the various countries on the American continent.

## DEATH

## Resulted After Having Teeth Extracted

Pat Boner of Mt. Vernon, a brother of Mrs. Lyman Durbin, died at the home of his brother, Hugh Boner, in Danville, Kansas, yesterday. His death resulted from having some teeth extracted. Mrs. Durbin reached Danville yesterday.—Danville Leader.

## HOUCK

## Is Interviewed By A Pennsylvania Editor

(Johnstown, Pa., Democrat)  
The Hon. Lewis B. Hough of Mt. Vernon, O., who is here with Mrs. Hough on a visit to his cousin, Wesley Green, and family on Vine street, paid a visit to The Democrat office yesterday and spent half an hour in discussing Democratic politics.

"The next president of the United States," said Mr. Hough, "is going to be a Democrat and Gov. Harmon of Ohio is the Democrat."

And with that remark Mr. Hough who has been very close to Governor Harmon for a number of years and who has been an active member of the general assembly in Ohio for some time, launched into an enthusiastic approval of the candidacy of the Ohio chief executive, whom he declared to be the one man who could carry the Buckeye states against any man the Republicans might name.

"The Democrats of Ohio," declared Mr. Hough, "were never in better shape than they are now. They are thoroughly united. There are no factions. We stand together as one man and we are for Harmon."

Mr. Hough was private secretary of the late Gov. Pattison of Ohio, who was a cousin of the late Gov. Pattison of this state.

Mr. Hough is a warm personal friend of ex-Mayor Tom L. Johnson and the Hon. John J. Lentz, both of whom are well known in Johnstown. "We are going to do our best to put John J. Lentz in the United States senate," Mr. Hough remarked as he was about to take his leave.

## COURT HOUSE NOTES

Second Partial—  
W. A. Hosack, guardian of Rosa Beckholt et al., has filed a second partial account in probate, showing the following: Received \$324.87, paid out \$74.65, balance \$250.22.

Marriage License—  
Carl Horlacher, glass worker, and Margaret Lutton, both of Mt. Vernon. (Consent filed.)

Deeds Filed—  
W. H. Snyder to Minnie C. Bechtol, 10 acres in Berlin, \$1,400.  
George W. Ewers to Minnie C. Bechtol, 40 acres in Berlin, \$2,350.

## ALCOHOL

is almost the worst thing for consumptives. Many of the "just-as-good" preparations contain as much as 20% of alcohol; Scott's Emulsion not a drop. Insist on having Scott's Emulsion

## CONDITION OF THE CROPS IN STATE OF OHIO

The following is the official report of the Ohio Department of Agriculture on crops and live stock, July 1:

The following report represents area, prospect and condition of crops named, as compiled from returns received from official correspondents of the department:

Wheat—Prospect compared with normal yield, 93 per cent.  
Wheat—Damaged by joint worm, 6 per cent.

Wheat—Area sown last fall, 1,721,030 acres.

Wheat—Original area plowed up, 2 per cent.

Wheat—Estimated area for the harvest, 1,682,874 acres.

Barley—Prospect compared with normal yield, 92 per cent.

Rye—Prospect compared with normal yield, 94 per cent.

Oats—Prospect compared with normal yield, 104 per cent.

Corn—Area in 1909, 3,050,825 acres.

Corn—Area compared with last year, 99 per cent.

Corn—Total estimated area for 1910, 3,006,115 acres.

Corn—Condition compared with an average, 83 per cent.

Corn—Damaged by cut worm, 9 per cent.

Corn—Damaged by white grub worm, 2 per cent.

Clover—Damaged by white grub worm, 3 per cent.

Potatoes—Area in 1909, 132,013 acres.

Potatoes—Area compared with last year, 97 per cent.

Potatoes—Estimated area for 1910, 128,680 acres.

Potatoes—Condition compared with an average, 93 per cent.

Tobacco—Area compared with last year, 108 per cent.

Timothy—Prospect compared with normal yield, 78 per cent.

Pastures—Condition compared with an average, 92 per cent.

Horses—Condition compared with an average, 98 per cent.

Cattle—Number compared with an average, 97 per cent.

Cattle—Condition compared with an average, 97 per cent.

Calves—Number compared with an average, 93 per cent.

Wool—Clipped compared with last year, 95 per cent.

Wheat shows the same prospective yield for the State as a whole as estimated one month ago, namely, 93 per cent. of a standard computed upon a basis of 15 bushels per acre being standard, represented by 100 per cent. The present report shows that 2 per cent of the original area seeded to wheat last fall was plowed up in the Spring, hence the total production for the 1910 harvest shows a decline of 532,176 bushels in comparison with the estimated production of last month. From returns received from 1158 official correspondents of this Department, we now estimate that for the present harvest there remains 1,682,874 acres, and this should produce an average of 14 bushels per acre, or 23,476,192 bushels for the State as a whole. The estimated production of wheat from the harvest of 1909 was 27,355,142 bushels, an average production of 16 bushels per acre. The damage to the crop by joint worm is not as serious as earlier predicted, being estimated at but 6 per cent for the State. In some counties the damage is quite serious, but in a majority of the counties it is of no consequence. The harvest will soon be in full blast, when the quality of the crop can be definitely determined.

The prospect for oats is now estimated at 104 per cent, based upon a standard of 100 per cent representing a production of 30 bushels per acre.

Charles Bieghley, of Millersburg, O., a bridge carpenter in the employ of the C. A. & C. Ry. Co., was severely injured while at work on the Koons bridge just east of the city at about three o'clock Friday afternoon. He was working with the machinery on the derrick when he accidentally caught his left hand in the cog wheels and before he could remove the hand, the second and third fingers were badly crushed and lacerated. He was taken to the office of Dr. N. R. Eastman where surgical attention was rendered.

## WORLD'S SHOOTING HONORS

Vienna, July 9.—The world's championship at clay-bird shooting is to be contested in the international tournament which is to open here tomorrow. In conjunction with the International Hunting Exhibition. Many of the noted marksmen of Europe have entered. The best result of a series of 100 birds shot at a distance of fifteen meters will decide the victory.

## HIAWATHA PARK

## The Jackson Bros.' Great Equine Paradox &amp; Roman Hippodrome Co. and Knox County Horse and Pony Show

## Commencing on Mon., July 18--All Week

The Jackson Company will give the following track races: Golden Chariot races, double team races to skelton wagon, Roman standing races, riderless horse race, flat race, the guileless wonder, the riding monkey, rube race, grand double feat, Roman chair race, tandem race, four horses breast race, and others both interesting and exciting, showing what wonderful feats these riders and horses are capable of performing. Twenty fast race horses at Park will give in addition some fine racing in speed classes.

The Park association also invite all owners of fine horses and ponies to join them this week in giving the best exhibit of the many fine equines in the county ever seen at Hiawatha.

If entries are made to Col. Hunt very soon so the program can be made for the week, a list of prizes will be published and every thing done that is possible to make this the banner equine week in Knox County.

THE HIAWATHA PARK ASSOCIATION COMPANY,  
Col. LeRoy G. Hunt, Superintendent of Park.

## KNOX CO. TEACHERS' EXAMINATIONS

1909-1910  
Meetings for the examination of teachers will be held at the CENTRAL SCHOOL Bldg., Mt. Vernon, Ohio,  
The first Saturday of every month

**Pupils' Examination**  
The third Saturday of April and the second Saturday in May. Examination will commence at 8:00 o'clock, a. m. Address all communications to the Clerk of Board of Examiners.

Organization of Board:
